

Year 1 Curriculum Map - Autumn Term 1 2025 - Palm Class

Maths

This term Year 1 are learning about pattern, shape, and sorting groups. We will also be learning how to order and represent numbers in lots of different ways. We will be learning to count on from any given number and recall number facts such as 1 more and 1 less.

English

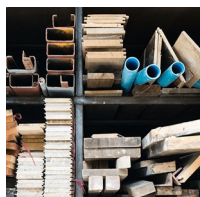

In English, we are learning to compose and write sentences which can be read by ourselves and others. We need to remember to use: capital letters, finger spaces and full stops.

We will begin by looking at some Traditional Tales such as 'Goldilocks and The Three Bears' which we will use to develop our writing. We will then move on to other fiction and non-fiction books, which will inspire our independent writing.

Reading

This term we will be consolidating Phase 3 sounds and learning to blend and read words with these sounds in, including Phase 4 words. We will be applying our phonics and reading skills by reading simple sentences and answering questions about what we have read. We will also be learning to recognise and read new tricky words.

Science: Everyday Materials

This project teaches children that objects are made from materials. They identify a range of everyday materials and their sources.

Children investigate the properties of materials and begin to recognise that a material's properties define its use.

History: Childhood History

In History we will exam the children's life history, and that of their families. We look forward to sharing baby photos! This project teaches children about everyday life and families today, including comparisons with everyday life in the 1950s, using artefacts and a range of different sources.

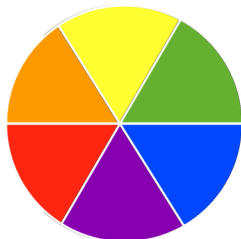

PSHE: Me and My Relationships

Through our PSHE lessons this term we will begin by considering why we have rules and then we will continue to develop our understanding of friendships, who is special to us, who can help us and who we can talk to if we have any worries.

Art & Design: Colour Mixing

This project teaches children about basic colour theory by studying the colour wheel and colour mixing. It includes an exploration of primary and secondary colours and how artists use colour in their artwork.

Geography: Our Wonderful World

In Geography, this topic teaches children about maps, cardinal compass points, and positional and directional language. They learn about the continents and oceans before thinking about why some countries are hot and some are cold.

R.E

In R.E the children will begin to learn what Christians believe God is like through looking at different stories from the Bible.
